CivicSetu — AI-Powered Civic Engagement Platform

Full-Stack Progress & Architecture Report (Backend REST API + MySQL + Premium Frontend SPA)

Project: CivicSetu AI Platform	**Date:** August 14, 2026
Stack: Django 5 + MySQL 8.0 + DRF + Vanilla SPA	**Status:** Full-Stack System Completed (175/175 Tests Passing)

1. Executive Summary

CivicSetu is a full-stack, enterprise-grade AI civic engagement and complaint resolution platform designed to digitize public municipal grievance reporting, authority resolution workflows, and real-time tracking. The project features a high-performance **MySQL database engine**, strict **Service-Layer Architecture** wrapped in transactional safety (@transaction.atomic), 175 automated unit tests across 10 core modules, AI grievance intelligence with automated NLP triage & duplicate detection, security audit trails, and a modern **Dark Glassmorphism Frontend Web Application** featuring Citizen, Authority, and Super Admin command portals.

2. Full-Stack System Architecture & Engineering

- **Service-Layer Business Logic:** Completely decouples business operations from views and serializers using dedicated services (*ComplaintService*, *AuthorityComplaintService*, *NotificationService*, *AuthorityDashboardService*, *AuthorityAnalyticsService*).
- **MySQL Database Architecture:** Production MySQL database utilizing InnoDB engines, utf8mb4 charset, indexed fields, foreign key constraints, and clean Django migration history.
- **Role-Based Security (RBAC):** JWT authentication (SimpleJWT) enforcing granular role separation across Citizens, Municipal Authorities, and Super Admins.
- **OpenAPI 3.0 Documentation:** Comprehensive API schema auto-generated via DRF Spectacular at /api/docs/.
- **Frontend SPA Design System:** Custom Dark Glassmorphism interface built with Vanilla CSS3 variables, CSS Grid, backdrop blur filters, responsive modal controllers, and real-time notification drawer.

3. Implemented Modules & Verification Summary

Module Name	Key Technical Capabilities Implemented	Status	Unit Tests
Auth & User Management	JWT Auth (SimpleJWT), Custom User Model, Profile Management, Role Enums (Citizen, Authority, Admin), Password Change, Profile Photo Upload	Completed	25 Passed
Department Module	CRUD APIs for 5 Departments (Road, Water, Electricity, Garbage, Drainage), Department Authority Assignment with designations, Department Statistics	Completed	48 Passed
Complaint Module	Complaint filing, Auto-generated Tracking Codes (CMP-YYYYMMDD-XXXX), Image Validation (JPEG/PNG/WebP, max 5MB), Public Status Tracking, History Timeline	Completed	40 Passed
Authority Module	Dashboard Aggregates, Status Update Engine, Resolution Notes & Evidence Upload, Priority Re-assignment, Scoped Analytics, In-App Notifications Engine	Completed	36 Passed
Feedback Module	Citizen 1-5 Star Ratings, Satisfaction Scoring, Timeliness & Quality Metrics, Department & Authority Performance Aggregations	Completed	9 Passed
AI Grievance Intelligence	Automated NLP Triage, Hazard Detection (Live Wire, Fire, Flood), Priority Prediction, Geospatial Haversine Duplicate Detection, City Insights	Completed	9 Passed
Audit Trail Logging	Immutable Security & Activity Logging, IP & User-Agent Tracking, Super Admin Audit Dashboard, Filter & Query Engine	Completed	8 Passed
Frontend Web App (SPA)	Dark Glassmorphism UI, Citizen, Authority & SuperAdmin Portals, File Complaint Dropzone Modal, Timeline Modal, Real-time Notifications, City Map View	Completed	Verified (SPA)

4. Quality Assurance & Testing Metrics

Metric	Value / Result	Details
Total Automated Tests	**175 / 175 Passed**	100% Pass Rate across all 10 backend modules
Database Engine	MySQL 8.0+	InnoDB Engine, strict tables mode, utf8mb4 encoding
Web App Served At	http://127.0.0.1:8000/	Integrated Django static & template pipeline
API Documentation	Swagger UI	Interactive schema at /api/docs/

5. Next Milestones & AI Integration

- **AI Predictions Module:** Machine learning models for automated complaint category classification, priority prediction, and duplicate issue detection.
- **Citizen Feedback & Rating Engine:** Post-resolution feedback ratings and municipal performance scoring.
- **System Audit Logs:** Security and administrative event auditing for compliance.
